CAREER OBJECTIVE

MCA graduate with hands-on experience in Java, Spring Boot, SQL, and backend development through internship and academic projects. Skilled in developing REST APIs, building database-driven applications, and applying object-oriented programming and problem-solving skills. Seeking a Java Backend/Full Stack Developer role to contribute to real-world projects and grow as a software professional.

EDUCATION

Master of Computer Application | OIST Bhopal | 2024 - 2026 | Percentage: 82%

Strong foundation in Java, Spring Boot, MySQL, DBMS, Operating Systems, Data Structures, and Full Stack Development.

Bachelor of Computer Application | ACMT Multai | 2021 - 2024 | Percentage: 75%

Foundational knowledge of programming, databases, and web development.

EXPERIENCE

Data Analytics Intern | Bluestock Fintech | May 2026 – July 2026

- Built an end-to-end ETL pipeline to process mutual fund data using Python, Pandas, and SQLite.
- Performed risk analytics using Value at Risk (VaR), Conditional VaR (CVaR), and rolling Sharpe Ratio calculations.
- Developed interactive Power BI dashboards to analyze fund performance, investor analytics, and SIP trends.
- Built a recommendation engine based on risk-adjusted return analysis.

Python Development Trainee | QSkill (April 2026 – May 2026)

- Worked on Python-based mini projects using Pandas, NumPy, and TextBlob
- Practiced data analysis and automation tasks using Python libraries
- Improved problem-solving and debugging skills through hands-on exercises

TECHNICAL SKILLS

Languages: Java, SQL, Python, HTML5, CSS3

Backend: Spring Boot, Spring MVC, Hibernate/JPA, REST APIs, Maven

Database: MySQL

Core CS: OOP, Collections, Exception Handling, JDBC, DBMS, OS, DSA

Tools: Git, GitHub, IntelliJ IDEA, VS Code, Postman

PROJECTS

Smart Retail Inventory & Billing Management System

Spring Boot | Spring MVC | Hibernate (JPA) | Thymeleaf | MySQL | Maven

- Built a full-stack retail management system using layered MVC architecture (Controller–Service–Repository)
- Implemented transactional billing logic using @Transactional to ensure atomic stock deduction and bill generation
- Designed relational schema with One-to-Many entity mapping (Bill → BillItem) using Hibernate/JPA
- Built product and billing modules with real-time stock tracking and automatic inventory reduction on sale

Face Recognition Based Attendance System

Python | OpenCV | scikit-learn (KNN) | Streamlit

- Built real-time face detection using OpenCV Haar Cascade classifier
- Trained a K-Nearest Neighbors (KNN) classifier using scikit-learn for face recognition
- Implemented CSV-based attendance logging with duplicate-entry prevention
- Built a live auto-refreshing dashboard using Streamlit for attendance monitoring

ACHIEVEMENTS / CERTIFICATIONS :

- Participated in Data Extraction Engineer Hackathon (Relu Consultancy)
- Java Programming Certification (KnowledgeGate) – Scored 98%
- Solved 100+ Data Structures & Algorithms problems on LeetCode
- Presented a research paper at IEEE Conference on Artificial Intelligence & Machine Learning (CODE-2K26)
- Oracle Certified Foundations Associate – AI (OCI 2025)

SOFT SKILLS

- Problem Solving • Communication • Leadership • Public Speaking • Teamwork • Time Management
